Admission Criteria Information

The ADN program admits students based on points. The points come from the grade point average of the prerequisite courses multiplied by 10, residency of the county as determined by the student’s status on admission to the college and the total grade point average if all 7 academic courses have been completed.

For example, a student living in McLennan County who has taken the prerequisite would have the following points:

- BIOL 2401 A = 16 points
- ENGL 1301 B = 9 points
- PSYC 2301 A = 12 points

Grade Point Average for the prerequisites: 3.7 X 10 = 37 points
- McLennan Co Resident = 1 point
- Has not completed all academics = 0

**Total Points** = 38

Applicants are required to take the PSB for RN candidates and pass it with a minimum of 25% in each of the five categories of the exam.

In the event multiple students have the same amount of points, the admission committee will consider the academic aptitude score first, giving preference to the higher academic aptitude scores. In the event there is a group with the same academic aptitude score, the second tier preference will be given to the natural sciences score, using the higher natural science score.

In this example, if we admit 40 students and there are 10 students with the same number of points at the cutoff at # 40, we will look at the academic aptitude score first. If there are 5 people with the same number of points and same academic aptitude score, we will look at the natural science score next.
