An Overview of the Medical Laboratory Technician Program at McLennan Community College

The medical laboratory technician (MLT) is an allied health professional who is qualified by academic and practical training to perform diagnostic testing in medical laboratories. Subspecialties of the profession include hematology, hemostasis, microbiology, parasitology, mycology, virology, clinical chemistry, immunohematology, immunology, toxicology, endocrinology, urinalysis and body fluids, phlebotomy, molecular techniques, quality control and quality assurance.

Medical laboratory technicians use basic and specialized laboratory skills, computer technology and knowledge of human pathology to provide information needed by the physician to diagnose and treat disease. Personal qualities essential to the profession include the ability to relate to people, a capacity for calm and reasoned judgment and a commitment to exceptional patient care. Medical laboratory technicians and phlebotomists must demonstrate ethical and moral attitudes and principles that are essential for gaining and maintaining the trust of professional associates, the support of the community, and the confidence of the patient and family. An attitude of respect for the patient and confidentiality of the patient's record and diagnoses must be maintained at all times. The medical laboratory technician and phlebotomist are responsible for his or her own actions, as defined by the profession.

A solid foundation in high school sciences, such as biology, chemistry, math and computer science, is needed to begin preparation for training as an MLT. The next step is a combination of formal education plus clinical education in a medical laboratory technology program accredited by the National Accrediting Agency for Clinical Laboratory Sciences, or NAACLS. The MLT program at McLennan Community College is designed to prepare entry-level medical laboratory technicians who play an important role in the detection, diagnosis, and treatment of human disease. Individuals interested in a career in medical laboratory technology should be flexible and adaptable to the needs of a growing profession. Medical laboratory technicians must be accurate, dedicated and skilled. They must also be self-motivated and have the ability to solve problems and make decisions. They must respond appropriately to challenges and take responsibility for their actions. MLTs must be reliable, emotionally stable, and able to finish a task once it is begun. An MLT must be able to communicate well, both in writing and in speaking. A successful MLT sets high standards, and demonstrate the ability to be a life-longer learner and are committed to the profession.

After meeting the academic and medical laboratory technician education requirements, MLT graduates from MCC are prepared to take a national certification examination in medical laboratory science. The American Society of Clinical Pathologists (ASCP) Board of Certification exam. The ASCP BOC MLT exam is recognized nationally and each student is encouraged to sit for this exam. The MLT program tracks student success on the national certification exam as an outcome measure for accreditation.
The MLT program at McLennan Community College is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS – www.naacls.org). The program admits one class each year in the fall semester. Class size is limited. The medical laboratory technician program culminates in the Associate in Applied Science degree in medical laboratory technology. The AAS degree is awarded upon successful completion of the college’s requirements for graduation and the degree is not contingent upon the student’s passing any type of external certification or licensure examination.

The MLT program at MCC requires academic courses in English, chemistry, anatomy and physiology, microbiology, speech, psychology or sociology, and mathematics. MLT courses reflect all areas of medical laboratory science and includes both didactic and clinical courses in laboratory fundamentals and safety, urinalysis, body fluids, phlebotomy, hematology, hemostasis, immunohematology, immunology, medical microbiology, parasitology, mycology, virology, medical chemistry, molecular techniques and computer applications. A certification-exam review during the final course is designed to be the program’s capstone experience for the MLT curriculum.

Students interested in phlebotomy only have the option of taking MCC’s phlebotomy course which is offered through the MLT program. Phlebotomy training includes both didactic and clinical phases. The Occupational Skills Award in Phlebotomy is a 13-credit-hour group of courses which better prepares the phlebotomy student for a career as a phlebotomist. This entry level career option may be completed in one semester and is available during the spring and fall semesters. Clinical sites for phlebotomy training may extend into an additional semester due to limited availability of clinical training sites. Successful completers of the phlebotomy lecture class (PLAB 1323) and clinical class (PLAB 1260) are eligible to take a national certifying examination in phlebotomy offered by ASCP.

McLennan Community College first offered a training program to individuals wanting professional education as a medical laboratory technician in the fall of 1982. The program is fully accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS) and has been in continuous operation since that date.

**MLT Program Mission Statement**

The mission statement of the medical laboratory technician program at MCC reflects the goal of program officials to prepare students to function in all areas of medical laboratory technology as competent employees in hospital and clinical laboratories across the nation. It states:

"The medical laboratory technician program at McLennan Community College affirms its mission to provide a comprehensive range of quality education and training for students enrolled in the MLT program. Program officials are committed to excellence in the program and are dedicated to assisting students to achieve their educational and professional goals through collaboration with professional organizations, hospital and clinical affiliations, business and industry."

**MLT Program Goals**

MLT program officials:

1. Are dedicated to the goal of enabling students to function in all areas of medical laboratory technology as competent employees in hospital and clinical laboratories.

2. Support MCC’s endeavors to develop a model of instruction that provides for transition to a learner-centered college.

3. Develop and maintain ways to assess the training needs of local employers by offering continuing education courses to laboratory employees in and around the Waco area.

4. Support the concept of life-long learning for students and laboratory employees as well as faculty and staff.
Graduates of the MLT program at MCC should be able to perform the following competencies as entry-level medical laboratory technicians:

1. Collect, process, analyze and transport biological specimens as appropriate.

2. Recognize and apply principles related to the use of laboratory information systems used in clinical laboratory science.

3. Perform analytical tests on blood, body fluids, and other substances tested in the clinical laboratory.

4. Recognize factors that affect procedures and test results and take appropriate actions within established guidelines using the skills of critical thinking and problem solving.

5. Recognize the clinical significance of laboratory procedures in the diagnosis and treatment of disease.

6. Perform and monitor quality control within established guidelines by applying the principles of critical thinking and problem solving.

7. Perform preventive and corrective maintenance on equipment and instruments and refer to appropriate sources as necessary.

8. Apply and encourage the use of the principles of laboratory safety and Standard Precautions.

9. Demonstrate professional conduct and interpersonal communication skills with fellow students, patients, laboratory personnel, other health care professionals, and with the public.

10. Recognize the responsibilities of other laboratory and health care personnel and interact appropriately with them for quality patient care.

11. Apply basic principles of science in learning new techniques and procedures.

12. Relate laboratory findings to common disease processes by recognizing the principles and methodologies practiced in all areas of the medical laboratory.

13. Establish and maintain life-long learning as a function of growth and maintenance of personal and professional competence.
MLT Essential Functions or Essential Requirements

These essential requirements are non-academic capabilities and tasks required by the medical laboratory technology and phlebotomy programs at McLennan Community College that reflect the physical, emotional, and professional demands required of the medical laboratory technician and phlebotomist.

Observation
The student must be able to:

- Observe laboratory demonstrations in which lab procedures are performed on biological specimens (i.e., blood and body fluids, culture materials and other specimens as appropriate).
- Characterize the color, odor, clarity, and viscosity of biological specimens and reagents.
- Use a clinical grade binocular microscope to discriminate among fine differences in structure and color (hue, shading, and intensity) in microscopic specimens.
- Read and comprehend text, numbers, and graphs displayed in print and on a monitor or audiovisual media.

Motor and Sensory Skills
The student must be able to:

- Move freely and safely about the laboratory in a timely manner.
- Lift and move objects weighing 20 pounds.
- Perform laboratory testing adhering to existing laboratory safety standards.
- Reach laboratory bench tops and shelves, patients lying in hospital beds or patients seated in specimen collection furniture.
- Travel to numerous clinical laboratory sites for practical experience.
- Perform moderately taxing continuous physical work, often requiring prolonged sitting and/or standing, over several hours.
- Grasp, hold, transport, and utilize specimens, reagents, hazardous chemicals and equipment in a safe manner as needed to perform laboratory testing.
- Obtain patient specimens in a timely, safe, and professional manner (e.g. perform phlebotomy).
- Use laboratory equipment (e.g. pipettes, inoculating loops, test tubes) and instruments to perform laboratory procedures according to established laboratory guidelines.
- Use a computer to operate laboratory instruments and to calculate, record, evaluate, and transmit laboratory information.
- Troubleshoot and correct equipment malfunctions.
- Detect and respond to emergency and instrumentation signals, lights, and sounds.
Communication
The student must be able to:

- Communicate effectively in written and spoken English; comprehend and respond to both formal and colloquial English, including person-to-person, by telephone, and in writing.
- Appropriately assess nonverbal as well as verbal communication.
- Read and comprehend technical and professional materials (i.e., textbooks, journal articles, handbooks, and instruction manuals).
- Follow verbal and written instructions in order to correctly and independently perform laboratory test procedures.
- Clearly instruct patients prior to and during specimen collection.
- Demonstrate sensitivity, confidentiality, and respect when speaking with or about patients or patients' information.
- Communicate clearly, accurately and tactfully with patients, faculty members, fellow students, staff, and other health care professionals verbally and in a recorded format (writing, typing, graphics, or telecommunication.)
- Independently prepare papers, prepare laboratory reports, and take paper, computer, and laboratory practical examinations.

Verbal communication includes the ability to ask and respond to formal and informal questions with confidence at an appropriate professional level.
Written communication includes the ability to use correct grammar and spelling as well as the appropriate level of formality.

Intellectual Skills
The student must be able to:

- Comprehend, measure, calculate, reason, integrate, analyze, evaluate, correlate, problem-solve and compare.
- Recognize abnormal laboratory results (e.g. patient and QC) and take appropriate action.
- Demonstrate critical-thinking and judgment skills appropriate to a given situation.

Behavior
The student must be able to:

- Organize and prioritize work, performing multiple tasks within given time constraints and under stressful conditions while maintaining the ability to communicate clearly.
- Possess the emotional health necessary to effectively employ intellect and exercise appropriate judgment.
- Be able to provide professional and technical services while experiencing the stresses of task-related uncertainty (i.e., ambiguous test ordering, ambivalent test interpretation), emergency demands (i.e., "stat" test orders), and a distracting environment (i.e., high noise levels, crowding, complex visual stimuli).
- Be flexible and adapt to professional, technical, and academic changes.
• Recognize potentially hazardous materials, equipment, and situations and proceed safely in order to minimize risk of injury to patients, self, and nearby individuals.
• Recognize emergency situations and take appropriate actions.
• Adapt to working with unpleasant biological specimens.
• Support and promote the activities of fellow students and of health care professionals. Promotion of peers helps further a team approach to learning, task completion, problem-solving, and patient care.
• Be honest, compassionate, reliable, ethical, and responsible.
• Accept and act on constructive criticism, critically evaluate self-performance, recognize and correct mistakes.
• Exercise independent judgment and accept responsibility for own work.

Professional Conduct and Appearance
The student must:

• Maintain general good health and self-care including a well-groomed, neat appearance.
• Maintain patient confidentiality and exercise ethical judgment, dependability, and accountability.
• Show respect for self and others and display attitudes of tolerance and integrity.
• Display professional attributes such as punctuality, professional demeanor and presentation, and cooperation.

Disabilities/ADA Statement

Disability Services

Student Services Center, Completion Center 249 • 254-299-8122 • disabilities@mclennan.edu
Fall & Spring Hours: Monday-Friday, 8 a.m.-5 p.m. • Summer Hours: Monday-Thursday, 7 a.m.-6 p.m. Click here for MCCs Accommodations webpage.

Disability Services is an academic support program that helps to provide equal access to educational opportunities and campus life activities for students with disabilities. We collaborate with students, faculty and staff to create usable, inclusive and sustainable learning environments. Disability Services strives to increase awareness and acceptance of those with disabilities in support of McLennan's commitment to enhancing each learner's potential and success.

Students requesting disability-based accommodations must contact the Disability Specialist and present qualified and current documentation detailing the diagnosis and effect of the disability.

Students are encouraged to contact the Disability Specialist immediately after registering for courses so that accommodations may be provided in a timely manner. The documentation must clearly identify that the student has one or more physical or mental impairments that substantially limit one or more of their major life activities.

Subsequently, the Disability Specialist reviews the documentation and determines appropriate accommodations. The Disability Specialist provides the student a letter to authorize and identify specific accommodations to the student’s instructor(s) and to other support services staff (Testing Center, Student Support Services).

Confidentiality is maintained at all times. And information is not released without signed student consent. Instructors and Testing Center staff are informed only of the necessary accommodation.

The Disability Specialist also provides information about accommodation approaches, including assistive and adaptive technology to students, faculty, and staff. He serves as the campus liaison with external agencies that provide funding and support services for students with disabilities. In addition, the Disability Specialist provides training to faculty and staff regarding the provision of reasonable accommodations to students with disabilities, and keeps faculty and staff apprised of ADA issues.

Students with Disabilities Preparing for Postsecondary Education: Know Your Rights and Responsibilities

Transition of Students with Disabilities to Postsecondary Education: A Guide for High School Educators
Americans with Disabilities Act Amended Acts of 2008 (ADAAA)

In accordance with the requirements of the Americans with Disabilities Act (ADA), and the regulations published by the United States Department of Justice 28 C.F.R. 35.107(a), and Section 504 of the Federal Rehabilitation Act of 1973, McLennan's designated ADA coordinators shall be responsible for coordinating the college's efforts to comply with and carry out its responsibilities under ADA.

Coordinator Contact Information

Accommodations Coordinator

254-299-8645

Students who have a disability (i.e. physical, mental, learning, vision or hearing) are welcome to contact the Disability Services office to arrange a confidential discussion.

This site is designed to provide current and prospective students, as well as faculty, with information related to disability services. Please explore the links to learn more about receiving services.

If you have difficulty accessing information from the Disability Services web pages, please call 254-299-8122 for assistance.

* Click Here for more information about Title IX (www.mclennan.edu/titleix)

Title IX

"No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance." Title IX of the Education Amendments of 1972, and its implementing regulation at 34 C. F. R. Part 106 (Title IX)

Title IX of the Education Amendments of 1972 is a Federal civil rights law that prohibits discrimination on the basis of sex in educational programs and activities that receive Federal funds. Examples of discrimination prohibited under title IX include discrimination on the basis of sex can including gender discrimination, pregnant and parenting discrimination, sexual harassment or sexual violence, such as rape, dating violence, domestic violence, stalking, sexual assault, sexual battery, and sexual coercion. In accordance with the requirements of the
Title IX Education Amendments of 1972 MCC's designated Title IX Coordinator, Drew Canham - Vice President, Student Success shall be responsible for coordinating the College's effort to comply with and carry out its responsibilities under Title IX.

We care about your safety, and value an environment where students and instructors can successfully teach and learn together. If you or someone you know experiences unwelcomed behavior, we are here to help. Individuals who would like to report an incident of sexual misconduct are encouraged to immediately contact the Title IX Coordinators by using the contact information below. Individuals also may contact the MCC Police Department at 254-299-8911.

Individuals who wish to speak with a confidential resource may contact Student Counseling Services at MCC by calling 254-299-8210. Any student or employee may report alleged offenses anonymously by visiting the following website: http://www.lighthouse-services.com/mclennan/
The goal of the program is to prepare students for career entry positions as medical laboratory technicians. Thus, specific professional competencies are the goal of graduates. The program strives, through its educational methods, to incorporate all facets of quality laboratory practice into the professional development of students. The curriculum is designed to prepare graduates in various testing and analysis skills.

1. Collect and safely handle biological specimens.
2. Perform accurate laboratory testing.
3. Evaluate and interpret laboratory test data.
4. Identify problems and take corrective action.
5. Use quality assurance to monitor procedures, equipment, and technical competency.
6. Operate equipment properly, and perform preventive and corrective maintenance.
7. Comply with established laboratory safety regulations.
8. Use computers and laboratory software effectively.
9. Evaluate the efficacy of new procedures and instrumentation for a given setting.
10. Demonstrate ethical behavior, and maintain confidentiality in terms of patient results.
11. Interact professionally with patients and other health care personnel.
12. Establish and maintain life-long learning as a function of professional competence.

Adapted from: The Rotation Manual for Clinical Laboratory Science, Lori Rice-Spearman and Hal S. Larsen, 1995
MLT Program Policies and Procedures

Admission to MCC

- Application forms for admission to McLennan Community College are available online at www.mclennan.edu and at the Office of Student Admissions. Students must be admitted to the college before enrolling in MLT curriculum courses and must be compliant with TSI requirements.

Admission to the MLT Program

- Application forms for admission to the Medical Laboratory Technician program are available on the MCC website www.mclennan.edu, from Student Services, or the MLT Program Director. Click here for the Medical Laboratory Technician webpage. Enrollment in the phlebotomy courses only (PLAB 1323 and PLAB 1260) does not require admission to the MLT program.

Admission Committee for the Medical Laboratory Technician Program

- The MLT admission committee meets in mid-July to review the files of all individuals who apply for admission to the MLT program. The application deadline is July 15th for the upcoming fall semester. Points are assigned to each applicant according to published admission criteria. Decisions concerning admission to the new MLT class are made during this meeting. The committee is made up of the Dean of Health Professions, VP of Instruction and the Dean of Student Services. Notification letters are mailed to applicants shortly after the committee meeting.

Letter of Notification

- Along with the letter of notification that announces acceptance into the program, the student will receive a short form that must be completed by the student and returned to the MLT program director. This form indicates the student's intent to either accept or decline admission into the MLT program.

Immunizations

- All MCC students enrolled in any health science program will be required to show proof of immunity to Hepatitis B, varicella, measles, mumps, rubella, and diphtheria/tetanus. Also, students will be required to have a flu shot and 2-step tuberculosis skin test or chest x-ray annually. Costs for immunizations and x-rays will be the responsibility of the student. Failure to comply with immunization schedule will result in student being withdrawn from the clinical course and possibly the program. Proof of immunizations does not guarantee acceptance into a health professions program. Such proof is necessary for the student to participate in direct patient care during clinical courses. Because clinical activities will begin in the first semester of the program, it is imperative that students applying for health science programs arrange to receive these immunizations by the first class day of the semester.
CPR Certification

- Documentation of current CPR certification (Basic Life Support for Healthcare Providers, approved by the American Heart Association) must be submitted to Complio, the computerized tracking system used by MCC health professions before starting clinical rotations. The cost for CPR certification is not included in any tuition or fee and must be assumed by the student as a separate program cost.

Drug Screens

- The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees; this includes students participating in clinical rotations in the facility. Competency extends technical skills to include screening for drug use.
- Drug screens must be completed within the thirty (30) days prior to a student’s initial entry into the clinical assignment portion of their respective Allied Health program. For some programs, clinical assignments begin immediately when classes begin for the semester. For other programs, clinical assignments are scheduled for later in the program. Verification of a negative drug screen must be received prior to the first clinical day in the student’s program. The results will be acceptable for all clinical rotations during the student’s enrollment in the program unless there is a break during that student’s enrollment. A break in enrollment (leaving the program) is defined as nonattendance for a portion of a semester or more. Attendance must be verifiable through the College.
- Cost of the drug screen will be the responsibility for any students entering an Allied Health Program at McLennan Community College. Students will use the testing agency designated by the College (Castlebranch). The student will be responsible for scheduling his or her own testing time at the agency and will be required to follow all procedures required by that agency for accurate testing. The students will be responsible for ensuring that the results of all testing be sent by the agency directly to the director of the allied health program in which they are admitted or enrolled.

Background checks

**Health Professions Division Criminal Background Check**

**Introduction**
The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees; this includes students doing clinical rotations in the facility. Competency extends beyond technical skills to an individual’s criminal history.

**Purpose:**
This policy is designed to protect the community of health care consumers from services provided by students who have documented illegal and unethical behaviors. These requirements also allow the Health Professions division to be in compliance with clinical affiliation agreements.

In compliance with HB 1508, students are advised that a criminal background could prevent licensure by the State of Texas. Students are further advised to consult with the program director or faculty member for guidance. Students also have the right to request a criminal history evaluation letter from the applicable licensing agency.
Policy:
Successful completion of a criminal background check is required for admission and continuation in all Health Professions Programs. Students will be given specific directions from the program about how to obtain the background check. Background checks may be honored for the duration of the student’s enrollment in the clinical program if the participating student has not had a break in the enrollment of a Health Professions class. A break in enrollment is defined as nonattendance of one full semester or more. The above information must be verifiable through the college/school and an attestation will be provided to the clinical agency. Individual programs may require more frequent background checks to meet clinical requirements.
The following histories will disqualify an individual from consideration for admission because the student would not be eligible for clinical placement: (this includes, but is not limited to):

- Murder
- Capital murder
- Manslaughter
- Criminally negligent homicide
- Hate crimes
- Unlawful restraint
- Kidnapping
- Aggravated kidnapping
- Continuous sexual abuse of a young child or children
- Indecent exposure
- Indecency with a child
- Improper relationship between educator and student
- Improper photography or visual recording
- Sexual assault
- Aggravated assault
- Aggravated sexual assault
- Intentional, knowing, or reckless injury to child, elderly individual, or disabled individual
- Intentional, knowing, or reckless abandonment or endangerment of child
- Deadly conduct
- Terroristic threat
- Aiding suicide
- Prohibited sexual conduct (incest)
- Agreement to abduct child from custody
- Violation of certain order in family violence case
- Violation of protective order preventing hate crime
- Sale or purchase of child
- Arson
- Robbery
- Aggravated robbery
- Burglary
- Online solicitation of minor
• Money laundering
• Fraud
• Identity theft
• Cruelty to animals
• Compelling prostitution
• Causing sexual performance by a child
• Possession or promotion of child pornography
• Any other offense for which registration as a sex offender is required
• Moral turpitude

The following histories will disqualify an individual from consideration for admission if the conviction occurred within the last five (5) full calendar years*:

• Assault punishable as a Class A misdemeanor or felony.
• Drug related issues
• Theft
• Misapplication of fiduciary property or property of financial institution punishable of Class A misdemeanor or felony
• Securing execution of a document by deception punishable as a Class A misdemeanor or felony (document tampering)
• False identification as a peace officer
• Disorderly conduct

*Any terms of probation must be complete prior to admission to a health professions program. The following histories will disqualify an individual from consideration for admission if the conviction occurred within the last 12 months*:

• Driving while intoxicated (DWI or DUI)
• Theft by check
• Public intoxication
• Minor in possession

*Any terms of probation must be complete prior to admission to a health professions program.

For students accepted to a clinical program with access to a licensing/registry body review process:

If an individual does not meet one or more of the aforementioned standards, she/he may pursue a declaratory order process with her/his licensing/registry body. If the licensing/registry body approves the individual to take the licensing/credentialing exam, the individual may be able participate in the clinical rotation, depending on the affiliation agreement.

Disclaimers

• Successful completion of a criminal background check for a Health Professions Program does not ensure eligibility for licensure or future employment.
• Individual Health Professions programs may require more frequent or multiple background checks in order to meet clinical requirements.
• Clinical agencies can establish more stringent standards, if they so desire, to meet regulatory requirements for their facility.
• Clinical agencies can conduct additional background checks at their discretion.
• If a student is found to be ineligible for clinical placement any time during the program, the student is unable to meet clinical learning objectives and will be withdrawn pending resolution of the situation.

Costs for Background Checks

All costs for criminal background checks are the responsibility of the student entering or enrolled in a Health Professions program at McLennan Community College. Students will use the testing agency designated by the College. The student will be responsible for scheduling his or her own time at the agency and will be required to follow all procedures required by that agency for accurate testing.

Screening Requirements

Successful completion of a criminal background check is required for admission and continuation in all Health Professions programs at McLennan Community College. Admission to a Health Professions program is considered conditional until the results of the criminal background check are approved by the program director. Students will be given specific instructions from the program about obtaining the background check.

Drug screens and criminal background checks must also be completed within the thirty (30) days prior to a student's initial entry into the clinical assignment portion of his or her respective health science program. For some programs, clinical assignments begin immediately when classes begin for the semester. For other programs, clinical assignments are scheduled for later in the program. Verification of a negative drug screen and a satisfactory criminal background check must be received prior to the first clinical day in the student's program. The results may be acceptable for all clinical rotations during the student's enrollment in the program unless there is a break during that student's enrollment. A break in enrollment (leaving the program) is defined as nonattendance for a portion of a semester or more. Attendance must be verifiable through the College.

Students who are not disqualified should not assume that their criminal background check shows no criminal activity. The student should report any convictions to the appropriate licensing or registry boards at least three months prior to the examination date. Each student must report within three business days to the Program Director and the Dean of Health Professions any arrests and/or criminal charges or convictions filed subsequent to the completion of the criminal background check. Failure to report will make the student subject to administrative withdrawal from the program.

Any student who changes programs or stays out of a Health Professions program at McLennan Community College for 12 months will be required to submit a new criminal background check and drug screen upon re-entry to the Health Professions Division.

The Health Professions division will provide an attestation of the background check and drug screen to clinical affiliates prior to each rotation. Clinical facilities may submit a written request for additional information regarding background checks and drug screens for students and faculty participating in clinical rotations.
Disclosure
Students are required to disclose any prior criminal record by accurately answering the following question on the application for admission to the Health Professions program:

*Have you ever been convicted of a crime other than a minor traffic violation? (Circle one)*

*YES  NO*

Please note that Driving Under the Influence (DUI) and Driving Under Suspension (DUS) are NOT considered minor traffic violations. Failure to disclose may result in withdrawal from the program of study.

Records of Criminal Background Checks
Criminal background checks and drug screens are reviewed securely through the provider’s website. Any printed records of criminal background checks will be kept in a secured file in the office of the program director of that student's Health Professions program. It will be accessible only to the program director, the program clinical coordinator, the Dean of Health Professions, any of the College Vice Presidents, the President of the College, the college attorneys, and any college judicial panel which may be created to review a student's case.
Health Professions Division Criminal Background Check

I have read and understand the Health Professions Division Criminal Background Check policy. I understand that I must abide by this policy throughout my enrollment in any Health Professions Program at McLennan Community College.

__________________________________________________________________________  ____________________________________________________________________
Student Signature                          Date

__________________________________________________________________________
Student’s Printed Name                     Student ID Number
Clinical Placement if placement not immediately guaranteed

- If the program finds that there are more enrolled students than can be accommodated at the clinical affiliates, volunteers will be solicited to accept a rotation schedule that would provide clinical training the following semester. In the absence of volunteers, eligible students will be given priority according to grades, allowing those with the highest grades preference in clinical scheduling.

Continuation in the MLT Program

- Credits for the associate in applied science degree include a minimum grade of 'C' or better (2.5 grade point average) in each major course in the technical curriculum. A major course is a course that has the prefix of the program (i.e., MLAB). A minimum grade of 'C' will be required for related courses when specified in the catalog course description as a prerequisite. A minimum grade of 'C' or better will be required for courses transferred or substituted to satisfy degree requirements.

- A student has five years in which to complete the Medical Laboratory Technician curriculum after official enrollment in the first MLT course. The first course restricted to students officially accepted into the MLT program is MLAB 1415 Hematology.

- Failing or withdrawal from any course in the program prohibits progression/continuation in the program. The student will be dismissed from the program and will need to repeat the application process as a new student.

Dismissal from the MLT Program

- Dismissal may be considered when misconduct by a student results in disciplinary action. These breaches of conduct are stated in the Highlander's Guide.

Appeals and Grievance Procedures

- During the course of the program should a student have an issue evolve with a faculty member, other student or program policy, the student is encouraged to bring the issue to light. A major component of the program is to develop professional behavior and professional communication skills which also includes professional and ethical handling of grievance procedures.

  The first step in the process is to address the issue directly with the individual faculty member (or student if it is a student-student issue) and see if resolution can be reached.

  To initiate the grievance process with a faculty member:
  - The issue must be written up in a concise but thorough manner and include possible solutions or resolutions to the issue.
  - The written grievance must be presented to the faculty within a 1-week (7 calendar days) timeframe of the occurrence that initiated the issue.
The faculty will then schedule a meeting within a 2-week time-frame (14 calendar days - extended time frame to allow for schedule conflicts due to class times and administrative obligations) from the date the written grievance is presented to the faculty member, to discuss with the student the grievance and attempt to find resolution.

If the student does not feel that the issue is satisfactorily resolved after meeting with the faculty member, the next step is:

- The student is to contact the MLT Program Director (PD) and present the director with the written grievance and subsequent actions taken to find a solution or resolution.
- The written grievance must be presented to the PD within a 1-week (7 calendar days) timeframe of meeting with the faculty member.
- The Program Director will then review the grievance and schedule a meeting to occur within a 2-week time-frame from the time the PD receives the grievance notification (14 calendar days - extended time frame to allow for schedule conflicts due to class times and administrative obligations) with the student to discuss potential solutions or resolution.

If the matter cannot be resolved at the Program Director level, the student may contact the Dean of Health Professions, within a 1-week time-frame (7 calendar days) from the date of the meeting with the PD, with the original written grievance as well as written documentation of the subsequent steps and results of the grievance process undertaken up to that point.

If the matter is not satisfactorily resolved at the end of this process, the student may contact a formal McLennan Community College grievance procedure. The Formal MCC Student Grievance Procedure is outlined in the Highlander Guide: MCC Student Handbook.

Complaints Outside of Due Process

Purpose: To address complaints that fall outside of due process, such as those submitted by clinical personnel, patients, or other stakeholders.

Policy: The program director of each Health Professions program will be responsible for handling complaints that fall outside of due process. In the event that the program director is not available or if it is inappropriate for the program director to address the complaint (e.g. the complaint involves the program director), the complaint will be forwarded to the Dean of Health Professions or the Vice President of Instruction.

- Complaints should be submitted in writing to the program director.
- The program director should respond to the complainant within 10 business days of receiving the complaint. When appropriate, the program director may consult with other offices and personnel to address the complaint.
- If the program director is unable to resolve the complaint, the person(s) may contact the Dean of Health Professions or Vice President of Instruction.
- Complaints will be handled in an expeditious manner.
• Complaints may be filed without fear of retribution or retaliation.
• Documentation regarding the complaint, any actions taken, and resolution will be maintained securely for five (5) years.

❖ The MLT program follows the appeals and grievance procedures as stated in the Highlander's Guide and the Health Careers Division Policy regarding grievances.

Fees, Costs and Tuition

❖ The current class schedule contains information concerning current fees, costs and tuition. A schedule of costs is available from the MLT program director.

Recording Device Policy

Students may only record/video class activities and instructors with permission of the instructor and in no circumstance are allowed to post recordings on any internet site or social network site. The recording may only be utilized by the individual. Students who do not remain in compliance with this policy will be written up, put on probation, or potential dismissed from the program based upon the extent to which the policy has been disregarded. The only exception is in the case of an ADA accommodation. Instructors must be notified of accommodations by the Disabilities Service office prior to them being used in the classroom.

Refund Policy

❖ The MLT and phlebotomy programs follow the refund policy as stated in the Highlander's Guide.

Service Work by Students

Medical Laboratory Technician students are not expected to perform service work and are not allowed to take the place of qualified staff during any clinical rotation. After demonstrating proficiency, students, with qualified supervision, may be permitted to perform procedures. A clinical affiliate, which employs a currently enrolled MLT student in a student assistant position, will schedule the student for work during non– instructional hours.

The student is not to be “pulled” from their instruction to perform the duties they normally perform as an employee, even temporarily. The student is to report such practice to the MLT Program faculty. A student who also works as an employee may not count their paid hours as clinical time as the student is performing the duties of an employee, not a student in training.

Advanced Placement

❖ In certain cases, academic course work may be challenged. Advanced placement for a student is arranged on an individual basis. All course substitutions must be approved by the Dean of Health Professions and the registrar.
Official Degree Plan

- The degree plan shows the academic and technical courses required for graduation with an Associate in Applied Science degree from McLennan Community College with a major in Medical Laboratory Technology. A signed degree plan is placed in the student's program file that is maintained in the office of the MLT program director.

Client Care Statement

- Clinical assignments will be made without regard to the sex, disability, creed, religion, color, age, national origin or disease condition of the client/patient. Therefore, students will be required to provide safe care for any client/patient assigned to their level of responsibility.

Cellular Telephones and Personal Calls

- Students are NOT to receive or place telephone calls or texts during class. Cellular telephones are to be turned off or set to vibrate before entering the classroom. If a student needs to receive a text/phone call during class time for emergency purposes (sick child, death in the family), the student must take the text/call OUTSIDE of the classroom. If a student chooses to text/call during class time for non-emergent purposes the student will be asked to leave class for that day.

Locker Policy

- MLT students will be allowed to use the lockers in the classroom/lab. The student’s name and locker number must be supplied to the program director within the first two weeks of each semester. If a lock is used on the locker, the student will be required to remove the lock at the end of the program. Failure to remove the lock will result in forced removal of the lock with the student being responsible for any charges incurred. Any items left in the lockers will be discarded.

Academic Dishonesty

- "MCC’s MLT program does not tolerate academic dishonesty of any kind. Students are expected to refrain from academic dishonesty. This includes any conduct aimed at misrepresentation with respect to a student’s academic performance. Examples of academic dishonesty include (but are not limited to):
  1. Cheating
  2. Plagiarism
  3. Collaborating with others if contrary to stated guidelines for the course
  4. Providing students who have not completed exams (lecture or lab) with any information related to the exam
  5. Intentionally assisting another student in any dishonest action
Violations of this policy will be brought to the attention of the student by the instructor. If there is suspicion of wrongdoing without corroborating evidence, the matter will be discussed with the student, and a verbal warning will be issued if warranted. If there is clear evidence that a violation has taken place, the instructor may impose a sanction ranging from a written warning to failure of the course. Failure of a course for any reason will result in the student not being able to continue in the MLT program.

If the student does not feel that the issue is satisfactorily resolved, the student should contact the MLT Program Director to discuss the matter. If the matter cannot be resolved at that level, the student may then contact the Dean of Health Professions. If the issue is not satisfactorily resolved at the end of this process, the student may initiate a formal grievance procedure. The Student Grievance Procedure is outlined in the Highlander Guide.

Any reported incidents of cheating will be investigated and documented with proper disciplinary action taken as necessary.

**Student Conduct**

The MLT and phlebotomy programs follow the student conduct policy of MCC as stated in the Highlander's Guide.

Students in the MLT program are expected to:

1. Use their own knowledge and skill to complete examinations.
2. Use their own knowledge to write papers or compile research presentation. If a quote or portion of another person’s work is issued, proper recognition must be given.
3. Respect the opinion of instructors and other learners. Student will refrain from making statements that insult, slur or degrade instructors, other health professionals or students. (This ethics statement does not infringe upon a student’s right to raise questions and request clarification, but does modify the manner in which the question is presented.)
4. Respect the limited resources of textbooks, library books, reprints and journals.
5. Assist in maintaining equipment in good working order. Students will refrain from misusing equipment.
6. Assist in maintaining class and laboratory rooms in good order. Students are expected to clean up after themselves when they have finished working in a particular area of the department.
7. Respect other student’s projects. Handling, stealing, altering, defacing, or otherwise harming another student’s work, especially in a manner which might cause the project to receive a lower grade, will NOT be tolerated.
8. Observe all policies and procedures established by the MLT program and all clinical facilities.
9. Respect the confidentiality of patient information regardless of source. Information in which any part of the patient’s name (or any identifying aspect of the patient) shall not be repeated outside the classroom, clinic or facility.
10. Work in cooperation with and demonstrate respect for other health care team members.
11. Protect the property and property rights of the program, clinic and patient. Students will not remove or borrow property without permission and shall not damage or misuse property.

- MLT and phlebotomy students are also expected to conduct themselves according to these ASCP Board of Certification Guidelines for Ethical Behavior.

Recognizing that my integrity and that of my profession must be pledged to the best possible care of patients based on the reliability of my work, I will:

1. Treat patients with respect, care and thoughtfulness.
2. Develop cooperative and respectful relationships with colleagues to ensure a high standard of patient care.
3. Perform my duties in an accurate, precise, timely and responsible manner.
4. Safeguard patient information and test results as confidential, except as required by law.
5. Advocate the delivery of quality laboratory services in a cost-effective manner.
6. Strive to maintain a reputation of honesty, integrity and reliability.
7. Comply with laws and regulations and strive to disclose illegal or improper behavior to the appropriate authorities.
8. Continue to study, apply, and advance medical laboratory knowledge and skills; and share such with other members of the health care community and the public.
9. Render quality services and care regardless of patients’ age, gender, race, religion, national origin, disability, marital status, sexual orientation, political, social, or economic status.

Disqualifications from Clinical Affiliation Participation

A student will not be allowed to participate in clinical affiliations if he or she is found to have a positive drug screen. If the student feels that the positive result is in error, he or she will be able to request a Medical Review through the testing agency and pay any additional fee for that service. The testing agency will have its Medical Review Officer assess the screen and follow through with an appropriate investigation. The student may be responsible for the cost of the medical review. A student will not be allowed to participate in clinical activity (removed from program) in any MCC Health Professions program for twelve (12) months following a verified positive drug screen. The student will then be required to undergo an additional drug screen which must be negative, prior to a clinical placement.

“For Cause” Screening (Zero Tolerance)

At any time during classroom, lab, or clinical portions of a health science program, the student is suspected of being under the influence of drugs or alcohol, the program faculty or clinical facility personnel may require the student to be tested for drugs and/or alcohol. If the clinical facility has the capability of doing the screen on site, the facility may use that service. The student is responsible for any cost of the screening. If a
student must be dismissed from the clinical facility during a clinical assignment to undergo testing and/or for inappropriate behavior due to possible drug or alcohol influence, the student will be responsible for providing contact information for someone to provide transportation for the student to be taken away from the site and, as necessary, to the college-designated testing agency. Failure by the student to comply with these policies is grounds for dismissal from the allied health program in which the student is enrolled. A positive drug or alcohol test is also grounds for dismissal from the program in which the student is enrolled. See the Health Professions Division Policy.

Student Dress

- All students in the medical laboratory technician and phlebotomy programs must follow dress guidelines. All students will maintain a conservative, professional appearance, especially during clinical assignments.

- Navy blue scrub pants and burgundy scrub shirts must be worn at all times by MLT/Phlebotomy students during clinical rotations. This uniform should also be worn when conducting laboratory sessions in the MLT student laboratory. Clothing should be neat, clean, and in good repair.

- White lab coats are to be worn over the scrubs. These lab coats are to be long-sleeved and the hem is to fall at or below the knee. Disposable lab coats are available at the clinical affiliates and in the student laboratories.

- Both the scrub top and the white fabric lab coat are to have the MCC arm patch sewn to the left sleeve for students.

- Impermeable/fluid resistant leather or vinyl walking shoes with white or color-coordinated socks must be worn with the uniform. Canvas tennis shoes are not acceptable. Shoelaces must be tied for safety. Shoes must be kept clean and in good repair.

- Appropriate name badges supplied by the college or clinical affiliate must be worn with the uniform at all times. The name and picture on the tag must be visible at all times.

- A watch with a second hand is necessary for all clinical rotations as well as many procedures in the student laboratory.

- Use of aftershave or perfume is prohibited.

- Deodorant or antiperspirant must be worn at all times.

- Grooming and body hygiene is required.

- Chewing gum, eating or drinking, smoking, or applying makeup is prohibited in the classroom, student laboratory, and in the laboratory departments of all clinical affiliates.
Hats are prohibited in the classroom, student laboratory, and in the laboratory departments of all clinical affiliates.

Sunglasses are prohibited in the classroom, student laboratory, and in the laboratory departments of all clinical affiliates.

Tattoos are not considered to be in the best interest of the medical laboratory technician and/or phlebotomy program and are only acceptable if covered completely from view in some way.

Jewelry may be a small ring and/or a wedding set.

No bracelets or necklaces may be worn in the laboratory departments of all clinical affiliates.

Small earrings may be worn. Multiple ear piercing is not acceptable.

Body piercing jewelry in any other form is not acceptable.

Shoulder length hair must be pulled back and secured away from the face. Extreme fashion statements such as shaving the head, radical haircuts or hairstyles such as bleaching, dying or tinting hair in unnatural colors is not acceptable. Facial hair must be neat and trimmed.

Fingernails should be kept clean and well groomed. Polish should be moderate and subdued. Chipped nail polish should be avoided. False or applied fingernails, multicolored nails, frosted, glitter, nail ornamentation, extremes in color or length are not acceptable.

Student Liability Insurance

Student liability insurance is purchased through the college as part of the medical laboratory technician program's tuition and fees. This limited liability coverage for students is effective only during clinical instruction. The student is NOT covered if employed outside of the clinical instruction time.

Student Health Insurance and Available Health Care Services

Neither the college nor any of the clinical affiliates assume financial responsibility for an injury or illness of the student during clinical hours. The student is strongly encouraged to carry private medical coverage and it is required by many clinical affiliates. The student must report an injury or illness to the clinical instructor and/or program director immediately. In January 2020, all MLT/Phlebotomy students will be required to show proof of health insurance.

The health career programs have identified a company that provides health insurance for students at a reasonable expense. Please check their website at www.ejsmith.com. Any provider is acceptable. You will be required to upload proof of insurance into Complio in January 2020 and beyond.
Students needing medical care are encouraged to seek the services of a physician at a local hospital, clinic, or with their family health care provider.

Director
Laboratory Services

Attendance

Regular and punctual attendance is expected of all students, and each instructor will maintain a complete record of attendance for the entire length of each course, including online and hybrid courses. Students will be counted absent from class meetings missed, beginning with the first official day of classes. Students, whether present or absent, are responsible for all material presented or assigned for a course and will be held accountable for such materials in the determination of course grades. In the case of online and hybrid courses, attendance will be determined in terms of participation.

Absence from 6 scheduled class days (excused or unexcused), will be taken as evidence that a student does not intend to complete the course, and the student will be withdrawn from the course with a grade of W. The instructor may reinstate the student if satisfied that the student will resume regular attendance and will complete the course. If the student’s 6th absence is reached after the official drop date, the instructor may assign a W if the student is passing and requests to be withdrawn. However, if a student who is not passing reaches the 6th absence after the official drop date, the student will receive an F. In extenuating circumstances, the instructor may assign a W to a student who is not passing. Each absence (whether excused or unexcused) will count toward attendance requirements in each course.

Students will be permitted to make up class work and assignments missed due to absences caused by (1) authorized participation in official College functions, (2) personal illness, (3) an illness or a death in the immediate family, or (4) the observance of a religious holy day. Also, the instructor has the prerogative of determining whether a student may make up work missed due to absences for other reasons for a grade no higher than a 75. It is the student’s responsibility to provide the proper documentation for an excused absence within 24 hours of the absence.
Students are expected to be in class on time.

For security reasons, the classroom door will remain locked at all times and students will be allowed entry before class starts. Attendance is recorded at the start of the class period. If you are not in the classroom by the time class starts, do not expect to be let in. Use the time wisely to be productive. If you must leave while class is in session, quietly pick up your course materials and exit the classroom. Since the doors are locked from the outside, you will not be able to come back into the class.
If a student enters class during a break or leaves before class is excused, s/he will be counted as absent. Students will be allowed entry and exit only during the start and finish of class, during break time, and in the case of an emergency. If you leave class, you will not be permitted to return until such time.

Student Absences on Religious Holy Days
McLennan Community College shall excuse a student from attending classes or other required activities including examinations for the observance of a religious holy day, including travel for that purpose. Students are required to file a written request with each instructor for an excused absence. A student whose absence is excused for this observance may not be penalized for that absence and shall be allowed to take an examination or complete an assignment from which the student is excused within a reasonable time after the absence. Religious holy day means a holy day observed by a religion whose places of worship are exempt from property taxation under the Texas Tax Code. McLennan Community College may not excuse absences for religious holy days which may interfere with patient care.

Attendance for Clinical Courses
Completion of clinical hour’s accounts for a significant portion of the student’s learning experience in the Medical Laboratory Technician program; therefore attendance is vitally important to the success of the student. There are occasions when an absence is necessary and we do understand that there is life outside of this program. HOWEVER, frequent absences cause the student to miss vital learning opportunities and will have an adverse effect on their final grade. Any student absent for more than 25% of the clinical class hours may be withdrawn from the course and may not continue in the program. The following is a breakdown of how an absence will affect your FINAL GRADE.

******KEY WORD FINAL GRADE******

1 day of absence = 0 (which may be saved and taken at end of semester)
2 days of absence= 5 point deduction from FINAL GRADE
3 days of absence= 10 point deduction from FINAL GRADE
4 days of absence= 15 point deduction from FINAL GRADE
5 days of absence= 20 point deduction from FINAL GRADE
6 days of absence= 25 point deduction from FINAL GRADE
7 days of absence= Below passing- removal from program

Just as in the workforce realm, it is professional courtesy that your supervisor be notified if you are to be tardy or absent. The student must contact the clinical coordinator by leaving a voice message or by email if there is a need to be absent. Failure to call the Clinical Coordinator will result in an unexcused absence and 10 points will be deducted from the final grade for each occurrence of failure to contact the CC in addition to the point deduction for the absence. The clinical coordinator and the supervisor at the clinical site should be notified of absences at least 1 hour prior to clinical start time.

Absences that have exceptions to the above rules are as follows:
1. The death of an immediate family member. (parent (including step and in-laws), spouse,
child, sibling) (Three clinical days maximum.)
2. The death of extended family member (grandparent, aunt/uncle, or cousin)(One day maximum allowed)
3. Subpoena to be present at a court case. (Jury duty does not qualify-court issued work notice required.)
4. Activities outside of clinic that are directed by the program faculty. (award ceremony, advisory committee meeting, and inclement weather).

Clinical Tardy Policy

Students are expected to report to their assigned clinical areas on time. A tardy constitutes ANY time after the pre-designated start time for the clinical rotation up to a 10 minute window. When the student is going to be tardy, they MUST contact the clinical coordinator by office phone or office email and should contact the clinical site to inform them of the likelihood they will be late.

Tardies accrue throughout the duration of the program, not per semester!! Every effort will be made to carry over tardies so the student is always aware of the number of tardies they have charged against them. Every effort will be made to make the student aware of tardies as they accumulate but failure to notify the student has no bearing on the outcome of the penalty for being tardy.

It is the responsibility of the student to have contact information for the clinical supervisor of the facility they are assigned to, and the clinical coordinator. Contacting the clinical site does not excuse the student for being late. It simply is professional courtesy. Clinical sites develop relationships with students and the welfare of their student is important to them. An absence will be charged for students arriving after the 10 minute window unless the student contacts the clinical coordinator with the intent to take an occurrence. In the event of requesting an occurrence, the student will have a 2 hour window from the original start time, to arrive before being charged with an absence. The clinical coordinator must be contacted as to whether or not the student is needing a tardy or an occurrence. The tardy policy is listed as follows:

1st -3rd Tardy- No consequence

A courtesy email may be sent to warn student of the future tardy consequences but failure to send a warning has no bearing on the outcome of an additional tardy. It is the responsibility of the student to contact the CC in the event that they are tardy. Failing to contact the CC is construed as a non-disclosure tactic in hopes that it will go unnoticed.

4th Tardy- The student is removed from the program.

Clinical Occurrence Policy

An “occurrence” is an event that requires the student to vary from their normally scheduled clinical time. A two hour window of opportunity is open for a student to take care of NECESSITIES outside of their control that interferes with scheduled clinical time.
H O W E V E R … … t w o p o i n t s w i l l b e d e d u c t e d f r o m t h e i r F I N A L C L I N I C A L G R A D E for every occurrence. Also, just as in absences and tardies, the student is required to notify the Clinical Coordinator and the Clinical Site Supervisor of the need for an “occurrence”. Failure to notify the CC or the clinical site supervisor PRIOR to the occurrence will result in an absence.

**EX:** If a student has a need to leave within two hours before their scheduled time to leave, it is considered an “occurrence”.

**EX:** If a student has an outside appointment that requires they arrive within a two hour window of reporting time, it is considered an “occurrence”.

**EX:** If a student has the need to leave clinical in the middle of the day and return within the two hour window, it is considered an “occurrence”.

**A B S E N C E V S O C C U R R E N C E**

**EX:** If a student fails to notify the CC or the clinical site supervisor of the need for an “occurrence”, it will be considered an absence!

Notification of “occurrences” will follow the same procedure as absences. Notification of CC and clinical site supervisor is a sign of professional courtesy and is required. A message must be left on the voice mail phone of the clinical coordinator for documentation purposes.

When leaving a voice mail, please identify yourself and leave a brief message regarding your situation, and a phone number where you could be reached if necessary.

**Grades**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100%</td>
</tr>
<tr>
<td>B</td>
<td>80-89%</td>
</tr>
<tr>
<td>C</td>
<td>75-79%</td>
</tr>
<tr>
<td>D</td>
<td>70-74%</td>
</tr>
<tr>
<td>F</td>
<td>69% and below</td>
</tr>
</tbody>
</table>

Final grades are rounded. For example, if you achieve a final score of 79.5%, it will be rounded up to an 80 and you will receive a B in the course. If you achieve a 79.4%, it will be rounded down to a 79 and you will receive a C.

Any student earning a grade of less than 75% on an assignment is required to schedule a conference time with the Program Director.

**Supplies**

1. MCC MLT/Phlebotomy scrubs/ lab coat
2. Closed-toe walking shoes
3. Name badge supplied by college
4. Black-ink Sharpie or permanent marker, fine tip
5. Watch/timing device with second hand
6. Black ink pen
7. Binder/notebook, paper, and/or lap-top computer for taking and storing notes and information
8. Calculator with square root function
9. Other supplies as indicated

Textbooks and Reference Books

➢ A copy of the current book list may be obtained from the program director. Required and suggested books may also be found on the MCC website through WebAdvisor.

➢ Note: Textbooks and reference books are subject to change without prior notice.

SCANS

➢ SCANS is the acronym for Secretary's Commission on Achieving Necessary Skills. The US Secretary of Labor appointed this commission in 1990 to determine the skills people need to succeed in their work. The SCANS criteria are divided into a three-part Foundation and five-part Competencies. The three-part Foundation includes basic skills that include literacy and computational skills, thinking skills described as necessary to put knowledge to work, and personal qualities described as making workers dedicated and trustworthy. The five Competencies include the ability to manage resources, interpersonal skills needed to work amicably and productively with others, the ability to acquire and use information, skills needed to master complex systems, and skills needed to work with technology.

It was the finding of the Commission that these skills "lie at the heart of job performance and are essential preparation for all students, both those going directly to work and those planning further education."

➢ SCANS criteria are incorporated into the MLT curriculum and are identified on course syllabi and in specific learning outcomes
# SCANS Matrix for the MLT Program

**Program:**  
Health & Medical Laboratory Technologists/Technicians  
(CIP 511000)  

**Credential:**  
Associate in Applied Science

Student Laboratory Safety Rules

- NO eating, drinking, smoking, chewing gum, or applying makeup in the laboratory.
- NEVER pipette by mouth.
- Wear a lab coat with the buttons closed. Remove the lab coat before leaving the lab.
- Use gloves at ALL times in the lab. Treat every specimen as biohazardous.
- Keep fingers and pencils or pens out of the mouth.
- Clean work area properly BEFORE and AFTER laboratory procedures.
- Wash hands BEFORE and AFTER laboratory procedures.
- Follow instructions for operation of the equipment and instruments.
- Handle equipment and supplies with care.
- Report ANY accident or injury to the instructor IMMEDIATELY.

Infection Control Policy

During the performance of clinical duties, student radiographers shall comply with Standard Precautions for preventing the spread of infection to patients, themselves and others. The following measures will be employed:

- Blood and body fluids from all patients must be handled as infectious material.
- All specimens of blood and body fluids should be put in a well-constructed container with a secure lid to prevent leaking during transport.
- All persons processing blood and body fluid specimens must wear gloves, plus a face shield if blood or body fluids are expected to splatter.
- Workers must change gloves and wash hands after specimens are processed.
- Workers must never pipette by mouth. Use mechanical pipetting devices.
- Laboratory work surfaces should be decontaminated with appropriate chemical germicide after a spill of blood or body fluids and when work activities are completed.
- Contaminated materials should be decontaminated before use or be placed in bags and disposed of in accordance with institutional policies.
- All persons must wash their hands after completing laboratory activities and must remove protective clothing before leaving the laboratory.
Needles and other sharp objects should be handled in such a manner to prevent accidental cuts or punctures. Used needles should never be recapped but discarded in an approved sharps receptacle.

Spills must be cleaned with appropriate solution promptly

**Exposure Categories**

All employees or students with direct or potential exposure to biohazardous materials are classified in one of the following exposure categories:

**Category I:** Those individuals who are routinely involved in the collection, packaging, transportation, treatment, processing, analysis, or disposal of biohazardous materials.

**Category II:** Those individuals who are occasionally involved (one to three times per month on average) with any of the activities listed above.

**Category III:** Those individuals who never handle biohazardous materials or work outside the designated biohazardous area.

**MLT and phlebotomy students are classified as Category I.**

**Bloodborne Pathogens**

Students will be exposed to blood or other potentially infectious fluids and materials during the academic/clinical laboratory portions of the program.

**Solutions:**

- Treat all blood and other potentially infectious materials according to OSHA Bloodborne Pathogen Standards (1910.1030 (d) (1).
- Wear gloves, masks and gowns if any exposure is anticipated. Wear gloves when contact with blood, mucous membranes, infectious materials or non-intact skin is anticipated. Wear gloves when starting IVs or when handling contaminated items or surfaces.
- All clinical sites provide Personal Protective Equipment. Ask the clinical instructor or clinical liaison if you have any questions or concerns.

**Important:**

Report any exposure to Bloodborne pathogens to the clinical instructor or clinical liaison immediately. Contact the MLT Program Director/Clinical Coordinator immediately. Complete appropriate incident reports.

**Patient Confidentiality / HIPAA Training Requirements and Responsibilities**

The Health Information Portability and Accountability Act of 1996 went into effect in April 2003. HIPAA regulations determine the handling of what is known as Protected Health Information. Serious consequences for failure to comply with these patient/client confidentiality regulations may apply, therefore, students in the MLT and Phlebotomy programs must comply with these regulations by:
1) Attending mandatory orientation and HIPAA training

2) Signing and dating the signature page indicating one’s understanding

3) Submitting the signed form to the MLT program director to be filed in the student's permanent record.

Further, students, faculty, and staff associated with the medical laboratory technician program and the phlebotomy program at MCC must understand and act in accordance with the applicable laws pertaining to the use and disclosure of patient information whether on or off-campus, before, during, and after class sessions, and during clinical assignments.

Client/Patient Bill of Rights

➢ The client/patient has the right to considerate and respectful care.

➢ The client/patient has the right to obtain from his/her physician complete current information concerning his/her diagnosis, treatment, and prognosis in terms the client/patient can be reasonably expected to understand.

➢ The client/patient has the right to receive from his/her physician information necessary to give informed consent prior to the start of any procedure and/or treatment.

➢ The client/patient has the right to every consideration of his/her privacy concerning his/her own medical care program.

➢ The client/patient has the right to expect that all communications and records pertaining to his/her care will be treated as confidential.

➢ The client/patient has the right to expect that within its capacity a hospital must make reasonable responses to the request of a client/patient for services.

➢ The client/patient has the right to obtain information as to any relationship of his/her hospital to other health care and educational institutions insofar as his/her care is concerned.

➢ The client/patient has the right to be advised if the hospital proposes to engage in or perform human experimentation affecting his/her care or treatment.

➢ The client/patient has the right to expect reasonable continuity of care.

➢ The client/patient has the right to examine and receive an explanation of his/her bill regardless of source of payment.

➢ The client/patient has the right to know what hospital rules and regulations apply to his/her conduct as a patient.

Source: American Medical Association
The MLT program is 12-months in length and includes sequenced coursework in all areas of the medical laboratory. These courses include:

**MLAB 1211  Urinalysis and Body Fluids**
An introduction to urinalysis and body fluid analysis, including the anatomy and physiology of the kidney, and physical, chemical and microscopic examination of urine, cerebrospinal fluid and other body fluids. Utilizes a student laboratory for experiences in basic urinalysis and body fluids analysis. Prerequisites: Admission to the medical laboratory technician program and approval by the program director.
Semester hours 2 (1 lec/2 lab)

**MLAB 1227  Coagulation**
A course in coagulation theory, procedures, and practical applications. Includes laboratory exercises that rely on commonly performed manual and semi-automated methods. Utilizes a student laboratory for experiences in basic coagulation procedures. Prerequisites: MLAB 1415 and admission to the medical laboratory technician program and approval by the program director.
Semester hours 2 (1 lec/2 lab)

**MLAB 1231  Parasitology/Mycology**
A study of the taxonomy, morphology, and pathogenesis of human parasites and fungi, including the practical application of laboratory procedures. Prerequisites: Admission to the medical laboratory technician program and approval by the program director.
Semester hours 2 (2 lec)

**MLAB 1235  Immunology/Serology**
An introduction to the theory and application of basic immunology, including the immune response, principles of antigen-antibody reactions, and the principles of serological procedures. Utilizes a student laboratory for experiences in basic immunology-serology procedures. Prerequisites: Admission to the medical laboratory technician program and approval by the program director.
Semester hours 2 (1 lec/2 lab)

**MLAB 1415  Hematology**
Introduction to the theory and practical application of routine and special hematology procedures, both manual and automated; red blood cells and white blood cell maturation sequences, and normal and abnormal morphology and associated diseases.
Utilizes a student laboratory for experiences in basic hematology procedures. Prerequisites: Admission to the medical laboratory technician program and approval by the program director. Semester hours 4 (3 lec/4 lab)

**MLAB 2401 Chemistry**
An introduction to the principles and procedures of various tests performed in clinical chemistry. Presents the physiological basis for the test, the principle and procedures for the test, and the clinical significance of the test results, including quality control and normal values. Also includes basic chemical laboratory techniques, chemical laboratory safety, electrolytes and acid-base balance, proteins, carbohydrates, lipids, enzymes, metabolites, endocrine function, and toxicology. Utilizes a student laboratory for experiences in basic clinical chemistry procedures. Co/Prerequisites: CHEM 1405 or CHEM 1411 and admission to the medical laboratory technician program and approval by the program director. Semester hours 4 (3 lec/3 lab)

**MLAB 2431 Immunohematology**
A study of blood antigens and antibodies. Performance of routine blood banking procedures, including blood group and Rh typing, antibody screens, antibody identification, cross matching, elution, and absorption techniques. Utilizes a student laboratory for experiences in basic immunohematology procedures. Co/Prerequisites: MLAB 1235 and admission to the medical laboratory technician program and approval by the program director. Semester hours 4 (2 lec/4 lab)

**MLAB 2534 Clinical Microbiology**
Instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, setup, identification, susceptibility testing, and reporting procedures. Utilizes a student laboratory for experiences in basic microbiology, parasitology, mycology, and virology. Co/Prerequisites: Admission to the medical laboratory technician program and approval by the program director. Semester hours 5 (4 lec/2 lab)

**PLAB 1260 Clinical-Phlebotomy Technician**
A method of instruction providing detailed education, training, work-based experience, and direct patient/client care generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement are the responsibility of the college faculty. Provides clinical training in phlebotomy. Co/Prerequisites: PLAB 1323 and admission to the college and approval by the program director. *This course is not required for the MLT degree.*
PLAB 1323  Phlebotomy
Skill development in the performance of a variety of blood collection methods using proper techniques and universal precautions. Includes vacuum collections devices, syringes, capillary skin punctures, butterfly needles and blood culture, and specimen collection on adults, children, and infants. Emphasis on infection prevention, proper patient identification, labeling of specimens and quality assurance, specimen handling, processing and accessioning. Utilizes a student laboratory for experiences in basic phlebotomy procedures. Prerequisites: Admission to the college and approval by the program director.
Semester hours 2 (7.5 external)

MLAB 1167 Practicum/Field Experience-Clinical/MLT
Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. Prerequisites: Admission into the MLT AAS program. Completion of all immunization requirements; acceptable background check and drug screen results.
Corequisites: Concurrent enrollment in MLAB 1227, MLAB 1415, MLAB 2431, and MLAB 1235.
Semester Hours 1 (7 clinical hours/week).

MLAB 2266 Practicum/Field Experience-Clinical/MLT
Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student.
Prerequisites: Successful completion of MLAB 1227, MLAB 1415, MLAB 2431, MLAB 1235, and MLAB 1167 with a minimum grade of C or better.
Semester hours: 2 (14 clinical hours/week)

MLAB 2232 Seminar in Medical Laboratory Technician/Assistant
Designed to reinforce didactic information with laboratory methodologies and to allow exploration of advanced techniques in medical laboratory technology.
Prerequisites: Successful completion of all MLAB courses in the first two semester of the Medical Laboratory Technician program.
Semester Hours: 2 (2 lec)

MLAB 2265 Practicum/Field Experience-Clinical/MLT
Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student.
Prerequisites: Successful completion of all MLAB courses in the first two semesters of the Medical Laboratory Technician program.
Semester Hours: 2 (14 clinical hours/week)
MLAB 2238 Advanced Topics in Medical Laboratory Technician/Assistant

This course examines the integration of all areas of the clinical laboratory and correlates laboratory test data with diagnostic applications and pathophysiology using critical thinking skills.
Prerequisites: Successful completion of all MLAB courses in the first two semesters of the Medical Laboratory Technician program.
Semester Hours: 2 (2 lec)
Clinical Assignments

Responsibilities and Clinical Rotation Hours for MLT and Phlebotomy Students

- Students must have passed or be passing the corresponding lecture course in order to attend clinical rotations. In the event a student’s corresponding lecture course grade drops below a 75, the student will be asked to wait for a clinical spot until a passing grade is achieved.

- You must be available during times appropriate for clinical rotations. Rotations are scheduled Monday through Friday during the day.

- **Be on time** for all clinical assignments; some clinical assignments may begin very early.

- Be dressed in the appropriate uniform.

- The clinical practice is a separate course from the classroom course. It has its own set of learning outcomes, evaluations, and final examination just as any other course does.

- **ALWAYS** call the designated contact person at the hospital or clinic if you are going to be late or absent from your scheduled assignment. *Failure to notify the appropriate person may result in disciplinary action including dismissal from the program.*

- **ALWAYS** call the clinical coordinator **AND** the program director if you are going to be late or absent from your scheduled assignment. *Failure to notify the appropriate persons may result in disciplinary action including dismissal from the program.*

- All students will follow their individual clinical schedule that has been confirmed by the clinical affiliate. Any deviation from this schedule must be approved by the contact person, the clinical coordinator **AND** the program director.

- Students will be expected to attend clinical sites both **locally and out-of-town.**

- You **must** have reliable transportation to all clinical affiliates. Some sites are an hour or more away. Transportation costs are not covered by any tuition or fee and are the **responsibility** of the student as an additional program cost.

- No student will be allowed to attend only a single clinical affiliate during the course of the program.

- The student is responsible for scheduling **ALL** make-up days. These days are to be made at the convenience of the designated contact person and the clinical affiliate. Make-up days must be confirmed by the clinical coordinator **AND** the
program director. Make-up days at the originally-scheduled site are not
guaranteed and you may have to wait for an available opening.

- Students are responsible for having all clinical materials with them while
  attending an assignment.

- Students are not to work on homework assignments other than clinical
  assignments during the clinical rotation. Failure to comply may result in
  disciplinary action including dismissal from the program.

- All paperwork is to be completed electronically or neatly in black ink. Pencil or
  any other color is not to be used.

- Students are to submit the Daily Task Sheet to the supervising technologist each
day. The technologist is to initial and date the form for verification/documentation
  of the student's clinical hours. Failure to comply may result in disciplinary action
  including dismissal from the program.

- Students are to submit the Competency Evaluation checklist/form to the
  supervising technologist. The technologist is to complete the form for
  verification/documentation of the work performed by the student. If a particular
  procedure is not performed at the clinical affiliate, the student and technologist
  should discuss the procedure. This form evaluates the student's performance,
  attitudes, and skills during his/her time spent at the clinical affiliate. It is to be
  completed by the technologist and forwarded to the clinical coordinator and/or
  the program director for review, verification, and signature. These forms are
  discussed with the student as appropriate and placed in the student's program
  file. Failure to comply may result in disciplinary action including dismissal from
  the program.

- Students are to complete the Student Evaluation of Clinical Site survey in
  Brightspace. This form is completed after the student completes his/her clinical
  rotation for the semester. The survey allows the program to provide feedback to
  the clinical sites.

- Students will NOT accept payment in any form for the time or work performed
during a clinical rotation. Failure to comply may result in disciplinary action
  including dismissal from the program.

- Students are expected to attend the clinical affiliate sites as assigned for the
  rotation period that has been confirmed by the clinical coordinator and the
  program director. Students who decide on their own to attend a clinical rotation
  that has not been approved may face disciplinary action and the time and work
  performed will not be included in the clinical hours required during the rotation.

- Some clinical sites may require orientation or special requirements for students
  attending rotations at their facility. For instance, some locations require that the
  drug screen results be no more than 30 days before attending the clinical rotation
  at their facility. This may mean that an additional drug screen has to be done to
  attend at the site.
Clinical rotations outside of the normal work day are at the discretion of the clinical coordinator/clinical liaison only if agreed upon by the program and specific objectives are associated with the unusual shift (i.e. instrument maintenance, start-up, etc.)

Students are expected to participate in various community programs and outreach. This may include MCC sponsored health fairs, MCC Scholar’s day, and other community events such as (Walk for the Homeless, MDA Association walk, etc.)

All complaints or concerns should be brought to the attention of the clinical coordinator or program director as soon as possible.

Remember the Patient Bill of Rights and maintain patient confidentiality.

The MLT Program Director has final approval of any and all clinical schedules.

### Attendance
Regular and punctual attendance is expected of all students. Students are expected to attend all clinical rotation days for the scheduled number of hours per day in order to fulfill the course requirements. All clinical absences (excused or unexcused) must be made-up.

### Tardiness
Students are expected to be at their assigned clinical site on time and must notify the clinical instructor immediately when he/she arrives. Failure to attend the entire clinical day (arriving late or leaving early) will be counted as a tardy. If the student arrives an hour or more after the assigned start time, the student will be counted absent and additional clinical time will be required. Three tardies will be counted as an absence which will result in formal counseling.

### Leaving the Clinical Site
If the student must leave the clinical site early, s/he must first gain authorization from the assigned clinical instructor and the MCC clinical coordinator of their intentions to leave the clinical assignment. If the student leaves the clinical site without notification or authorization, this will be considered a non-notified absence and the student will receive an absence for that day. In order to be dismissed from the clinical site, students must 1) obtain prior approval from the clinical instructor and MCC clinical coordinator and 2) accurately record the time out on the daily task sheet. If the student leaves more than one hour early, the student will be required to schedule additional clinical time in cooperation with the MCC clinical coordinator and the clinical site.

### Rules of Attendance
More than 2 (two) unexcused absences or failure to notify the MCC clinical coordinator, Program Director and clinical site instructor of an absence will result in failure of the course. Students must submit proper documentation for excused absences. Students will be permitted to make up clinical time missed due to absences caused by (1) authorized participation in official College functions, (2) personal illness, (3) an illness or a death in the immediate family, or (4) the observance of a religious holy day. It is the
student’s responsibility to inform the MCC clinical coordinator of the reason for an absence prior to the excused absence and then provide the proper documentation for the absence.

Dismissal from Clinical Site

Students who are dismissed from the clinical area for specific reasons (e.g., no name tag, inappropriate dress, hygiene, illness, etc.) shall receive an absence that will require notification of the MCC clinical coordinator and MCC Program Director. The student should contact the MCC Clinical Coordinator to schedule an appointment to review the cause for dismissal and permission to return to the facility. Additional clinical time will be arranged, if needed, based on site availability.

Any student dismissed by a clinical affiliate and asked not to return will undergo formal counseling and possible disciplinary action including dismissal from the program. A student who has been rejected by more than one clinical affiliate will be dismissed from the program and will receive a failing grade for the course.

Exceptions to the above policy statements based on extenuating circumstances will be considered on an individual basis and must be approved by the MLT Program Director.

Subject to Change Disclaimer

The policies, regulations, procedures, and fees associated with this program are subject to change without prior notice, if necessary, to keep College and program policies in compliance with State and Federal laws and/or with rules related to the program’s accrediting agency.

The College and the program reserve the right to change curricula, rules, fees, and other requirements, of whatever kind, affecting students in any way. The provisions of this document do not constitute a contract, express or implied, between any applicant, student, faculty or staff member and McLennan Community College or this program.

Teach Out Plan

In the event that the Medical Laboratory Technology Program at McLennan Community College would close, any student currently enrolled in program specific (MLAB) courses or in the process of completing the program would be allowed to complete the didactic and clinical courses needed to finish the degree. No new students would be accepted into the program.

In the event that there is a catastrophic event and didactic coursework could not be delivered on the McLennan campus through face to face instruction, the program would first attempt to continue courses through the use of the learning management system (Brightspace). Laboratory instruction would be provided through partnership with affiliated clinical sites or on the campus of regional community college or universities with appropriate facilities.
In the event that a catastrophic event interferes the operations of a clinical affiliate, the college will attempt to place the MLT students at other functioning sites to complete their clinical coursework. If the college is unable to provide clinical or didactic courses by any means due to a catastrophic event, the MLT program make every effort to collaborate with MLT programs in the region to provide current students with the opportunity to complete their education.

**Non-Discrimination Policy**

McLennan Community College is dedicated to providing equal opportunities to all individuals and does not discriminate against any individual regardless of race, color, religion, national or ethnic origin, gender, disability, age, veteran status, genetic information, sexual orientation, gender identity, pregnancy, or other legally protected category in its educational programs, activities, or employment as required by Title VI and Title VII of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Educational Amendments Act of 1972, and the Age Discrimination Act of 1978.

For inquiries concerning the College’s compliance with this non-discrimination policy, please contact one of the following administrators, each of whom is trained to assist in these matters:

Concerns dealing with **TITLE IX** and other non-specified **Civil Rights Issues** contact either:

**Drew Canham**, Title IX Coordinator  
Vice President, Student Success  
Administration Building, Room 408  
254-299-8645  
FAX: 254-299-8654  
dcanham@mclennan.edu or titleix@mclennan.edu

For more information, see [http://www.mclennan.edu/titleix/](http://www.mclennan.edu/titleix/).

Concerns dealing with the **American with Disabilities Act (ADA)** contact either:

**Drew Canham**, Title II & 504 Coordinator  
Vice President, Student Success  
Administration Building, Room 408  
254-299-8645  
FAX: 254-299-8654  
dcanham@mclennan.edu

**Stephen Benson**, Title I & II  
Vice President, Finance & Administration  
Administration Building, Room 404  
254-299-8649  
FAX: 254-299-8654  
sbenson@mclennan.edu

For more information, see [http://www.mclennan.edu/about/ada](http://www.mclennan.edu/about/ada).
Concerns dealing with Equal Employment & Educational Opportunity (EEO) contact:

For more information, see http://www.mclennan.edu/about/eeo.

MCC’s Non-Discrimination policy is located online at http://www.mclennan.edu/employees/policy-manual/docs/E-XXXIV.pdf.

A lack of English language skills will not be a barrier to admission to and participation in career and technical education programs. La falta de conocimiento del idioma inglés no será un impedimento para la admisión y participación en programas de educación técnica y profesional.

NOTIFICACIÓN DE NO DISCRIMINACIÓN
McLennan Community College se compromete a proporcionar igualdad de oportunidades a todas las personas y no discrimina a ninguna persona independientemente de la raza, color, religión, origen nacional o étnico, género, discapacidad, edad, condición de veterano, información genética, orientación sexual, identidad de género, embarazo u otra categoría legalmente protegida en sus programas educativos, actividades o empleo, según lo exige el Título VII de la Ley de Derechos Civiles de 1964, la Sección 504 de la Ley de Rehabilitación de 1973, el Título IX de la Ley de Enmiendas Educativas de 1972 y la Ley de Discriminación por Edad de 1978.

La Ley sobre Estadounidenses con Discapacidades (ADA, por sus siglas en inglés) y la política del McLennan Community College prohíben la discriminación en el empleo y los programas educativos contra personas calificadas con discapacidades. Los sitios web de las universidades deben ser accesibles para que los estudiantes, estudiantes potenciales, empleados, invitados y visitantes con discapacidades tengan un acceso equivalente a la información y funcionalidad que se proporciona a las personas sin discapacidades.

La política de McLennan Community College es proporcionar adaptaciones razonables o ajustes académicos cuando sea necesario. Estas adaptaciones y ajustes deben realizarse de manera oportuna, individualizada y flexible.

Es responsabilidad de cada estudiante, miembro del personal y del cuerpo docente identificarse como una persona con discapacidad cuando requieran una adaptación o ajuste. También es responsabilidad de cada estudiante, cada miembro del personal y del cuerpo docente documentar su discapacidad (a través de un profesional debidamente licenciado) y demostrar cómo la discapacidad limita su capacidad para completar las funciones esenciales de su trabajo o limita la participación del estudiante en programas o servicios de la institución. La documentación médica será resguardada bajo estricta confidencialidad.

Los estudiantes y los miembros del personal y del cuerpo docente deben mantener las normas institucionales de desempeño.

La institución no discrimina en los procesos de admisión, programas educativos o empleos sobre la base de cualquier factor antes descrito o prohibido bajo la ley vigente.

Para obtener información sobre el cumplimiento de esta política de no discriminación por parte de la institución, comuníquese con uno de los siguientes administradores, cada uno de los cuales está capacitado para asistir en estos asuntos: Si tiene inquietudes relacionadas con el TÍTULO IX y otras cuestiones de derechos civiles no especificadas, póngase en contacto con:

Drew Canham, coordinador del Título IX, vicepresidente Éxito Estudiantil
edificio administrativo de McLennan Community College, Sala 408
1400 College Drive
254-299-8645
FAX: 254-299-8654
Si tiene inquietudes relacionadas con la Ley de Estadounidenses con Discapacidades (ADA), póngase en contacto con:
