The law does not apply to students age 22 and over or to students who are enrolled only in online classes.

McLennan students who are required to have the vaccination will not be allowed to register until they provide proof of immunization to Highlander Central in the Enrollment Services Center.

Documentation showing that the student has received the immunization within the last five years must be provided at least 10 days prior to the first day of the semester in order to register for classes. Students must submit one of the following in order to be cleared for registration:

- the signature or stamp of a physician (or his/her designee) or public health personnel on a form that shows the month, day and year the vaccination dose or booster was administered.
- an official immunization record generated from a state or local health authority.
- an official high school or college transcript that includes documentation of immunization provided by school officials (including records from other states).

After submitting proof of immunization, there will be a waiting period to allow for the processing of immunization information before a student will be cleared for registration.

Getting the Immunization

Students should get the bacterial meningitis vaccination from their primary care physicians.

Students who are already established patients with Family Health Center clinics can get the vaccination anytime during regular business hours: 8 a.m.-5 p.m., closed from noon to 1 p.m. for lunch. Appointments are not necessary. Please call 254-313-5800 for more information.

About Meningitis

Bacterial meningitis is a serious, potentially deadly disease that can progress extremely fast. It is an inflammation of the membranes that surround the brain and spinal cord. The bacteria that cause meningitis can also infect the blood. This disease strikes about 1 in 20,000 people each year with the highest incident rate in 16-25 year olds. There is a treatment, but those who survive may develop severe health problems or disabilities.

Symptoms of bacterial meningitis include:

- High fever
- Rash or purple patches on skin
- Light sensitivity
- Confusion and sleepiness
- Lethargy
- Severe headache
- Vomiting
- Stiff neck
- Nausea
- Seizures

There may be a rash of tiny red-purple spots caused by bleeding under the skin. These can occur anywhere on the body. The more symptoms, the higher the risk, so when these symptoms appear seek immediate medical attention.

Diagnosis is made by a medical provider and is usually based on a combination of clinical symptoms and laboratory results from spinal fluid and blood tests. Early diagnosis and treatment can greatly improve the likelihood of recovery.

The disease is transmitted when people exchange saliva (such as by kissing, or by sharing drinking containers, utensils, cigarettes, toothbrushes, etc.) or come in contact with respiratory or throat secretions.

Possible complications of the disease include:

- Permanent brain damage
- Kidney failure
- Learning disability
- Hearing loss, blindness
- Death (in 8 to 24 hours from perfectly well to dead)
- Limb damage (fingers, toes, arms, legs) that requires amputation
- Gangrene
- Coma
- Convulsions

The disease can be treated with antibiotics, which – if received early – can save lives and increase chances of recovery. However, permanent disability or death can still occur. The vaccines available are safe and highly effective.

You can get more information about bacterial meningitis from your health care provider or the Waco-McLennan County Health District at 254-750-5410.

IMPORTANT: You will NOT be allowed to register without proof of immunization if the requirements apply to you.
NOTE: All files must be completed by July 1 for the fall semester and November 1 for the spring semester.

Please print clearly.
