

Palo Alto GlobalProtect VPN Installation Guide

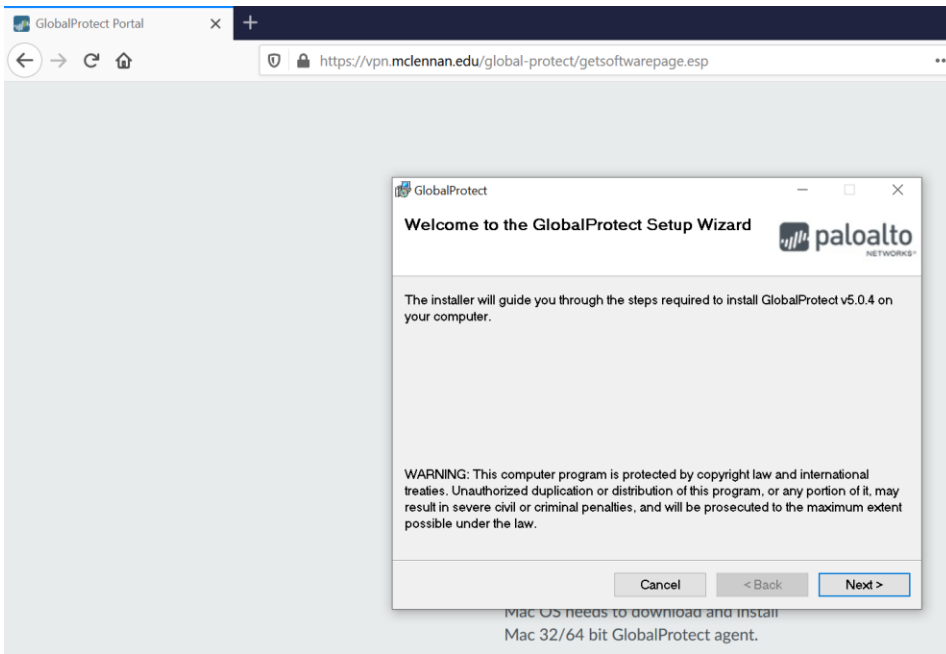

1. Click the URL listed below.
<https://vpn.mclennan.edu>
2. Use your network login and password to login (i.e. jdoe).

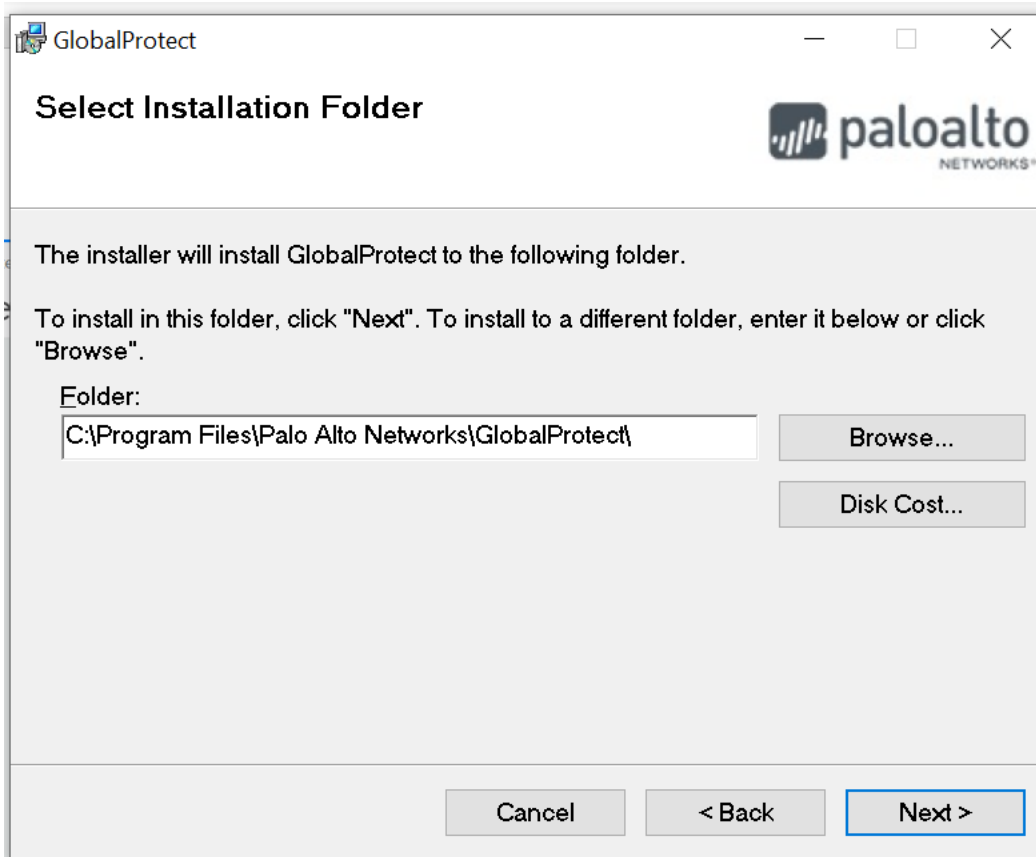

3. Click the download option that meets the requirements for your computer. Most users should select the Windows 64-bit download.
4. Download and Run the program to install the VPN GlobalProtect software.

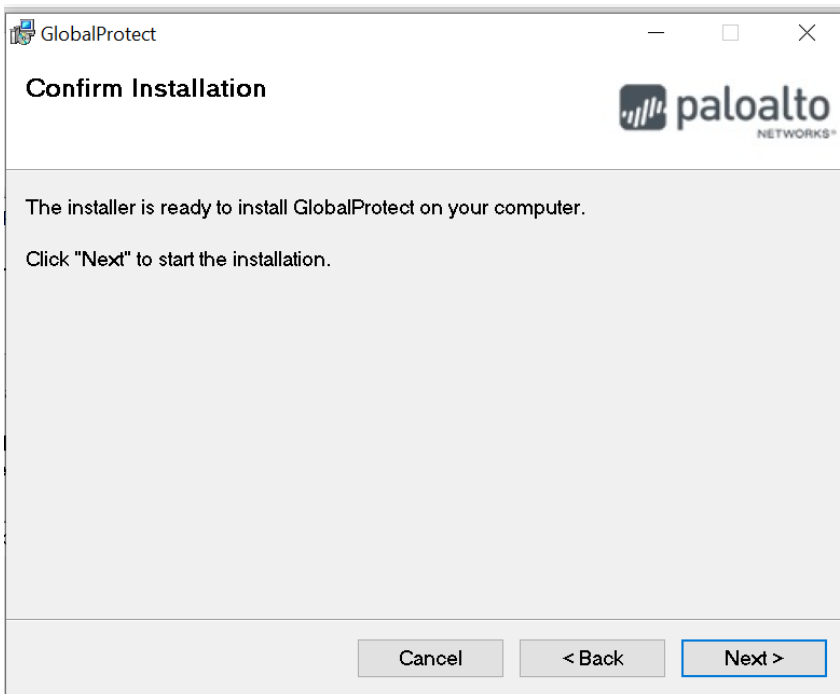

5. Once you run the program, click Next to start the Setup.

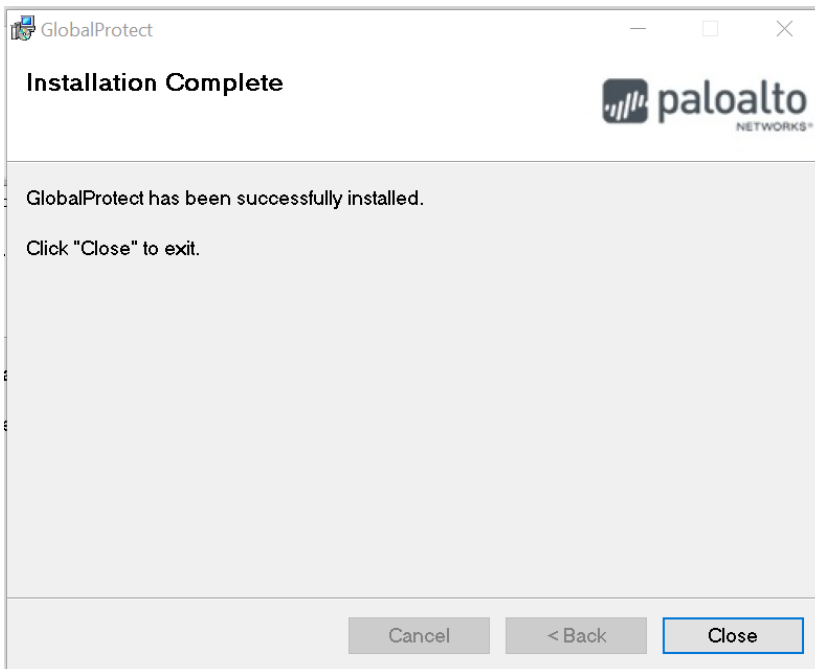

6. Click Next at this screen.

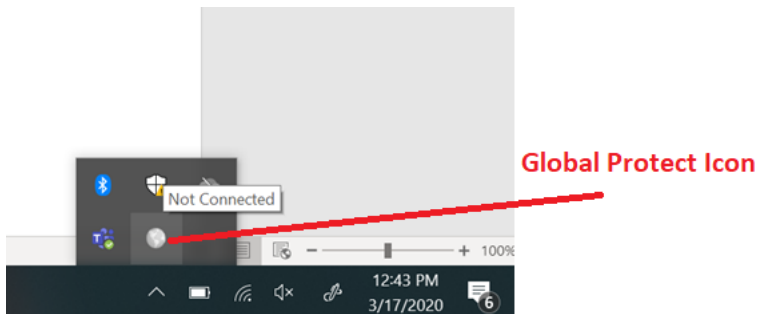

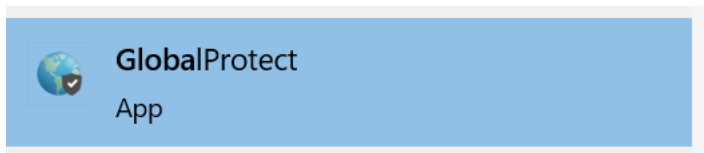

7. Click Next to finish the install.

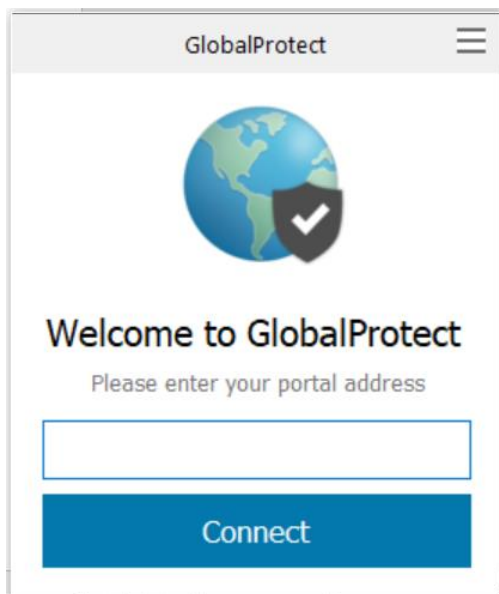

8. Click close to end the install.

9. The GlobalProtect Icon will be located in the Taskbar.

10. When you open the GlobalProtect icon, type vpn.mclennan.edu in the address field.

11. User your regular network username and password to connect to the GlobalProtect VPN system.
